

Upcoming Construction in Your Area

Construction on the Lake Frank Trail Project in Rock Creek Regional Park will begin in July 2011. You may see construction workers in your area working on this project. The major work will take place between this Summer and the end of 2011/early 2012.

This project is located within Rock Creek Regional Park and will connect the Rock Creek Hiker-Biker Trail to the trail system on the east side of Lake Frank. This 0.5 mile connector will follow the alignment of an existing natural surface trail that runs along the east side of the park. The Lake Frank Trail is an Intercounty Connector (ICC) Community Stewardship Project and will be constructed by the State Highway Administration (SHA).

Please remember the following:

- **Never** go onto a construction site. Do **not** cross over the fencing. **Only workers are allowed on site.**
- **Stop**, look and listen for trucks and equipment around construction zones.
- Do **not** hang out near construction zones!
- If you see kids playing in a construction zone or have questions or concerns about the project, please call 1-866-462-0020 or email iccproject@sha.state.md.us.
