Upper Paint Branch Limited Area Trail Plan

The public is invited to review preliminary recommendations and provide feedback on a natural surface trail plan in the Upper Paint Branch watershed at a public meeting.

This plan is intended to provide natural surface trail access to the public while minimizing impacts to the natural and cultural resources in the area. Existing informal trails, potential new connections to other trails, parks, and community facilities such as schools and recreation centers have been explored.

The recommendations offered at this meeting are the result of community input from a public meeting held this past June, online comments and staff analysis.

The Montgomery County Planning Board will review the preliminary plan recommendations later this fall for development of a draft plan for their review this winter.

Additional information for this plan is online at ParkPlanning.org.
